

Arunakiri Venkatachalam

Data Scientist | arunakiri.github.io/ark-react

Bangalore | +91 741-890-8007 | arunakiri.v@gmail.com

Professional Summary

With 8 years of experience, I am proficient in Python building end-to-end Data and AI solutions with real business impact. I have had the opportunity to work in complex environments designing scalable data pipelines and cloud-based applications that enable faster decision-making.

Technical Skills

- **Frameworks:** Python, Django Web Framework, Shell, REST API, SQL Alchemy
- **Dev-Ops:** Docker, Kubernetes, Git/GitHub, CI/CD DevOps, OAuth 2.0
- **Analytics:** Power BI, Grafana, Plotly Dash, Streamlit
- **Data Science:** Machine Learning, Artificial Intelligence, Image/Text Scanning

Experience

DATA SCIENTIST

VOLVO | OCTOBER 2023 – PRESENT

- Designed scalable data solutions in a secure on-premises Data Science Lab environment, supporting 200+ users.
- Engineered high-frequency ETL pipelines and designed web applications for Hydrogen Engine Rigs and fleet data, improving data availability and reducing latency significantly.
- Built LLM agents using RAG pipelines for custom documents and MCP integration on data sources to enable domain-specific Q&A, conversational analytics, and in-chat data visualization.
- Led the site-wide Volvo Data Science Conference 2026, coordinating cross-functional sessions and knowledge sharing and collaboration across teams.

LEAD ANALYST

HCL | OCTOBER 2021 – OCTOBER 2023

- Delivered data engineering solutions as a consultant for Volvo across multiple teams and use cases.
- Supported MATLAB-to-Python migration initiative, reducing licensing costs by 30%.
- Converted key analytical solutions (Dolly Tire, Geo Location, Battery SoC) into scalable Python implementations.
- Conducted Python training sessions to enable wider adoption across teams.

SENIOR SYSTEM ENGINEER

INFOSYS | APRIL 2018 – OCTOBER 2021

- Built OCR-based data extraction solutions for Novartis, achieving ~80% accuracy.
- Automated extraction of structured data from unstructured PDFs and images, reducing manual effort.
- Designed PostgreSQL-based data storage and Power BI dashboards (PIL Boards), enabling faster access to and analysis of product information.

Education

Bachelors in Electronics and Communications | CEG, Anna University, Chennai

2012 - 2016

Masters in Data Science And Engineering | BITS Pilani, Hyderabad

2020 - 2022
