# Arunakiri Venkatachalam

**Data Scientist** | arunakiri.github.io/ark-react

Bangalore | +91 741-890-8007 | arunakiri.v@gmail.com

## Professional Summary

With 8 years of experience, I am proficient in Python building end-to-end Data and AI solutions with real business impact. I have had the opportunity to work in complex environments designing scalable data pipelines and cloud-based applications that enable faster decision-making.

## Technical Skills

- **Frameworks:** Python, Django Web Framework, Shell, REST API, SQL Alchemy
- **Dev-Ops:** Docker, Kubernetes, Git/GitHub, CI/CD DevOps, OAuth 2.0
- **Analytics:** Power BI, Grafana, Plotly Dash, Streamlit
- **Data Science:** Machine Learning, Artificial Intelligence, Image/Text Scanning

## Experience

**DATA SCIENTIST** — **VOLVO | OCTOBER 2023 – PRESENT**

- Designed scalable data solutions in a secure on-premises Data Science Lab environment, supporting 200+ users.
- Engineered high-frequency ETL pipelines and designed web applications for Hydrogen Engine Rigs and fleet data, improving data availability and reducing latency significantly.
- Built an LLM-powered AI Agent to analyze Hydrogen Rigs data, enabling quicker insights and reducing dependency on manual data exploration
- Led the site-wide Volvo Data Science Conference 2026, coordinating sessions and bringing together teams to share ideas and work.

**LEAD ANALYST** — **HCL | OCTOBER 2021 – OCTOBER 2023**

- Delivered data engineering solutions as a consultant for Volvo across multiple teams and use cases.
- Supported MATLAB-to-Python migration initiative, reducing licensing costs by 30%.
- Converted key analytical solutions (Dolly Tire, Geo Location, Battery SoC) into scalable Python implementations.
- Conducted Python training sessions to enable wider adoption across teams.

**SENIOR SYSTEM ENGINEER** — **INFOSYS | APRIL 2018 – OCTOBER 2021**

- Built OCR-based data extraction solutions for Novartis, achieving ~80% accuracy.
- Automated extraction of structured data from unstructured PDFs and images, reducing manual effort.
- Designed PostgreSQL-based data storage and Power BI dashboards (PIL Boards), enabling faster access to and analysis of product information.

## Education

**Bachelors** in **Electronics and Communications** | CEG, Anna University, Chennai — 2012 - 2016

**Masters** in **Data Science And Engineering** | BITS Pilani, Hyderabad — 2020 - 2022
